PRESENTATION OF A COMPREHENSIVE RANGE NON-DESTRUCTIVE TESTING SERVICES

www.energo-nest.com

LEADER IN SERVICE SOLUTIONS FOR THE OIL AND GAS AND ENERGY SECTORS

Wide range of services

Maintenance of lifting cranes, electric motors, and oil and gas equipment.

Modern diagnostic methods

Application of non-destructive testing to assess the condition of equipment.

Highly qualified personnel

Solution of engineering and technical tasks in the oil and gas and energy sectors.

**Maintenance and
repair of lifting
cranes**

Repair of electric motors

Non-destructive testing

SOLUTIONS FOR PROGRESS

● Innovations

Energo Nest Limited Group provides a full range of services, from crane installation to equipment maintenance and non-destructive testing, with a strong focus on quality and professionalism in the oil and gas and energy sectors.

Non-Destructive Testing Laboratory Facilities in the Oil and Gas Industry

Storage tanks

Metal structures
(construction)

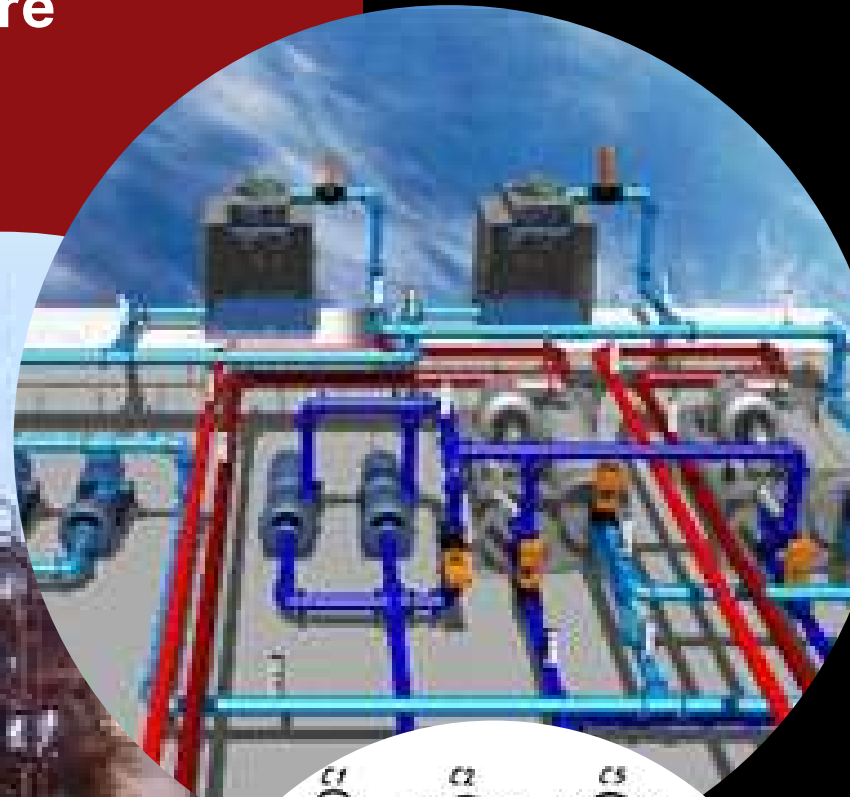

Cranes and lifting
equipment, hoisting
mechanisms

Containers

High-pressure
equipment

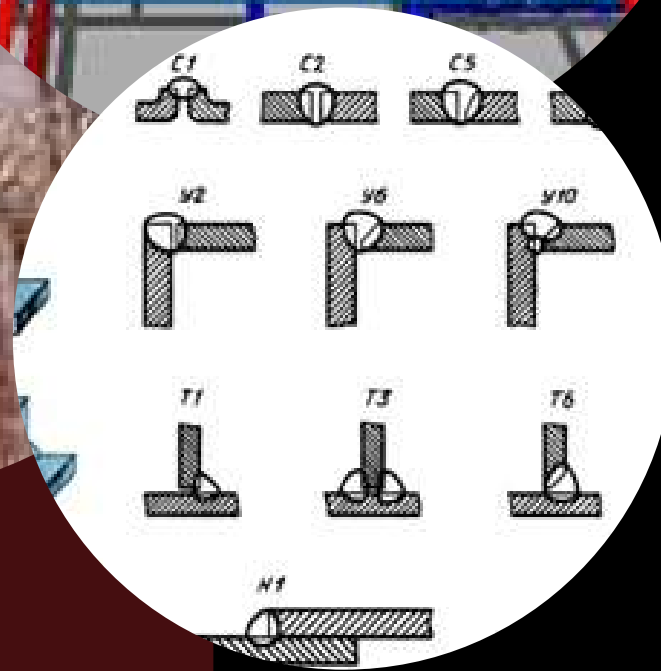

Pipelines

Welded joints

Boilers and heat exchangers

Well-equipped laboratory with expert personnel using advanced non-destructive testing methods.

**Visual inspection
(VI)**

Vacuum testing

**Magnetic particle testing
(MPT)**

**Hydrostatic testing
Pneumatic testing**

Liquid penetrant testing (LPT)

Hardness measurement

Ultrasonic testing (UT)

**Static testing
Dynamic testing**

Innovative non-destructive testing methods

Advanced technologies for accurate diagnostics and defect detection.

Overview of methods

- Ultrasonic testing: Uses ultrasonic waves to detect internal defects.
- Radiographic testing: Analyzes defects using images produced by X-ray penetration.
- Magnetic particle testing: Detects defects using visible magnetic particles on damaged areas.
- Liquid penetrant testing: A liquid fills cracks, making surface defects visible.
- Eddy current testing: Changes in the distribution of eddy currents indicate the presence of defects.

99 %

**Defect detection
efficiency**

Key approaches that set us apart from others

Client engagement and flexibility

- **Continuous engagement:** Regular communication and feedback ensure long-term client relationships.
- **Flexibility and customized solutions:** Tailored approaches to each client's needs, providing maximum benefit.
- **Growth focus:** Expanding services, developing partnerships, and implementing marketing strategies contribute to company growth.

Service integration and expertise

- **Comprehensive solutions:** Services include crane maintenance, spare parts supply, and repairs, saving clients' time and resources.
- **Expertise and professionalism:** Qualified personnel ensure high quality and reliability of services.
- **One-stop provider:** Offering a wide range of services in one place for client convenience.

What sets us apart?

Our approaches to work.

Client-oriented approach

- **Continuous engagement:** Regular communication with clients and gathering feedback helps build long-term relationships and improve service quality.
- **Flexibility and customized solutions:** The company adapts its approach to each client, focusing on finding the best solutions for individual needs, ensuring maximum benefit.

Comprehensive service and professionalism

- **Integrated solutions:** Providing a wide range of services, from equipment condition assessment to crane repairs, saving clients' time and resources.
- **Expertise and growth:** Ensuring a high level of professionalism and continuously expanding services, partnerships, and staff development to maintain market presence and competitiveness.

Examples of Non-Destructive Testing Laboratory Projects

www.energo-nest.com

Baker Hughes – Hydrostatic testing of wellhead equipment

Turkmenbashi Oil Refining Complex – Visual inspection, ultrasonic testing, liquid penetrant testing, and vacuum testing of 3,000 m³ storage tanks.

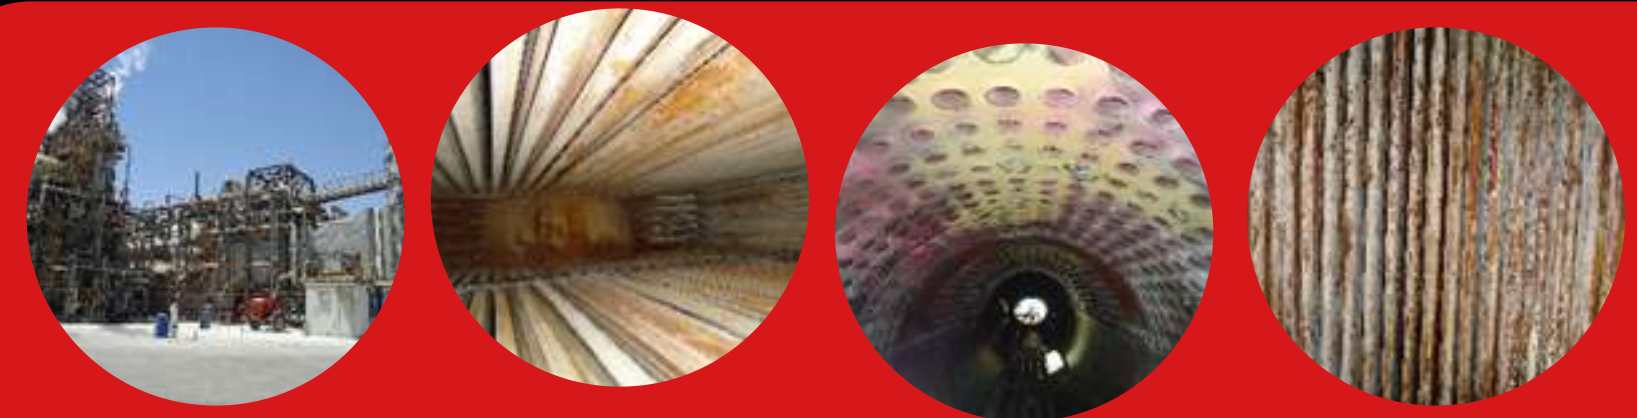

Dimension – Magnetic particle testing, hydrostatic testing, and load testing of wellhead equipment.

ENI – Non-destructive testing of a lifting crane and lifting device.

Tegenkarbamid Plant – Ultrasonic testing of welded joints and assessment of the technical condition of the steam boiler.

Technological Center of the Academy of Sciences of Turkmenistan – Assessment of the technical condition of a waste incineration boiler.

Non-destructive testing equipment

www.energo-nest.com

Thickness gauge

Hardness tester

Magnetic flaw detector

Consumables

Ultrasonic flaw detector FD560

Laser thermometer up to 750°C

Permanent magnet

Ultrasonic test samples

Vacuum equipment

Hydrostatic testing unit up to 1200 bar

Ultraviolet lamp

Visual inspection instruments

Standards of modern non-destructive testing: local and international approaches

**A large number of standards
and other regulatory
documents**

**Diverse work execution
procedures**

Projects completed for government, private, and international enterprises

No	CLIENT NAME	Type of business	Contract / PO number	Effective Date:	Valid Date:	Project Description & Place	Period in years	Contract Status
1	ENI Turkmenistan LTD	Service	5000019874	06.05.21	05.05.23	Provision of Inspection and Certification for Lifting equipment, Burun Field, Turkmenistan	2 years	Completed
2	The Technology Center of the Academy of Sciences of Turkmenistan	Service	TM-RH-06/22	29.06.22	30.12.22	Provision of Inspection and Maintenance of Pressure Vessels	6 months	Completed
3	Western Atlas	Service	WAI-0061-2023	01.01.23	31.12.25	NDT & Hydrotest	1 years	Ongoing
4	ES "Geljege Miras"	Service	RH/GM-01	17.05.23	17.12.23	Inspection of Lifting equipment and wire ropes in ETL base in Burun Field	7 months	Ongoing
5	Rönesans Endüstri Tesisleri İnşaat Sanayi ve Ticaret Anonim Şirketi	Service	SBL-79	14.08.23	14.08.24	NDT Inspection		Ongoing
6	IE "Emir Ogly"	Service	RH/EO-01	17.11.23	31.12.23	Provision of non-destructive inspection of low-power boilers	1 month	Ongoing
8	Industrial Union "Ahal Gurlushyk"	Service	No1	23.01.2024	31.12.23	Provision of hydro test of boilers	1 years	Completed
9	ES "Geljege Miras"	Service	RH/GM-01.24	14.03.24	31.12.24	Inspection of Maintenance of equipments in ETL base in Burun Field	9 months	Ongoing
10	Halliburton Eurasia Limited	Service	CW333311	29.11.23	29.11.24	Inspection, testing and certification of Lifting appliances, Inspection, pressure testing / certification of hoses	1 years	Ongoing
11	Industrial Union Tedjenkarbamid plant	Service	RH-TK-001	19.09.2022	31.12.2022	Provision of Inspection and Certification boilers	3 month	Completed
12	ES Turkmenenjam	Service	RH/TE-01	01.11.2023	31.12.2023	Provision of Inspection and Certification pipelines	2 month	Completed
